Three examples to show just how effective VIRUSOLVE+ is:

Example.1. MRSA (EN1276) started with 3,240,000,000 bacteria and were reduced in one minute contact time to less than 10 in clean and dirty conditions.

Example.2. Clostridium difficile spores (EN 1276 & EN 14347), started with 15,300,000 spores and were reduced in one minute contact time to less than 10 in both clean & dirty conditions.

Example.3. HCV (hepatitis C) After one minute contact time HCV RNA was not detectable in the serum samples.
